

Welcome to „Pilates Zentrum Münster“

What is Pilates?

Pilates is a mind-body workout emphasizing proper breathing, correct spinal and pelvic alignment, and concentration on smooth and flowing movement. You actually learn how to control your movements and body..

In Pilates the quality of movement is valued over quantity of repetitions. Proper breathing is essential, and helps you execute movements with maximum power and efficiency. Last but not least, learning to breathe properly and move gently can reduce stress.

You can develop a strong core and a strong back. The core consists of the deep abdominal muscles along with the muscles closest to the spine. Control of the core is achieved by integrating the trunk, pelvis and shoulder girdle. Pilates elongates and strengthens, improving muscle elasticity and joint mobility.
